

ADP Network Solutions

GetWired™ Remote Access

Keep connected while on the go

ADP Network Solutions

- GetWired™
- GetWired™ Internet Manager
- GetWired™ Remote Access

Provide secure, reliable access to your dealership's network for offsite employees, telecommuters, vendors, or consultants with GetWired Remote Access Virtual Private Network (VPN).

When working remotely, all you'll need is a computer and an Internet connection. PFW takes it from there, giving remote PCs easy access to your dealership network, e-mail, files and more. This results in lower costs when your vendors and employees can work remotely and greater productivity when they can take their work with them. To ensure your dealership is receiving a solution that meets your dealership needs, size, and budget you can either select e-VPN Remote Access or Hosted Remote Access.

GetWired Remote Access Solutions

Now you can enable telecommuters and branch offices to remotely access your dealership's files and applications.

- Reduce consultant and vendor costs by providing secure, remote access to the applications or data they need
- Enable any Internet connection, including cable, dial-up, and DSL. Remote PCs require Internet connectivity

Now you can choose a solution sized for your business and get the same world-class security technology. ADP offers two remote connectivity service options to fit your dealership's needs:

Remote access for up to five users with Hosted Remote Access

- ADP handles system administration with reliable network equipment and security
- Supports all end users
- Eliminate on-site hardware installation from your dealership, reducing your costs

Larger dealerships need e-VPN Remote Access for 5-100 remote users

- Dealership IT manager handles system administration and user support
- Any necessary training for e-VPN equipment (made by Cisco Systems®) is provided by ADP
- Advanced security for your system is provided by ADP

GetWired Remote Access gives you all of the security, connectivity, and support you need to take your work with you and stay connected to the dealership's network.

ADP Network Solutions – A Complete Suite of Network Security Offerings

GetWired

ADP's GetWired is the foundation for protected access to the Internet. This complete network security solution includes business-grade Internet connections, powerful security management tools, and responsive technical support.

Internet Manager

GetWired Internet Manager frees up bandwidth for Internet usage, boosts employee productivity and protects you as an employer by allowing managers to control and track Internet usage and restrict access to Web content deemed inappropriate for a work environment.

Remote Access

Provide secure, reliable access to your dealership's network for offsite employees, telecommuters, vendors, or consultants with GetWired Remote Access Virtual Private Network (VPN).

By combining our two companies, PFW and ADP can now offer the largest and most comprehensive selection of products and services to equipment dealers worldwide. These cost-effective, leading-edge solutions have been developed by ADP to help grow your dealership business. Backed by ADP, you can expect the same quality and reliability you have come to expect from PFW.
